

TRABAJO PRACTICO ESPECIAL GIT

MATERAZZI

MATERIA:

Tecnología de la Información en las Organizaciones

ALUMNOS:

Moauero, Manuel

Medina, Fermin

Miguez, Ignacio

Arleo, Agustín

PROFESORES:

Dr. Rodríguez, Guillermo

Ing. Rodríguez, Florencia

Introducción

Dadas las consignas del trabajo nos propusimos crear una página web que sea escalable y fácil de editar para poder cumplir los requerimientos solicitados en la entrega final del trabajo practico especial. Esta página es “MATERAZZI”, una página web simple, amigable y sencilla en la que cualquier persona se puede adaptar fácilmente. “MATERAZZI” está dividida en cinco secciones:

“**Home**” en la cual se informa al usuario que es el mate y como se fabrica. Bajando sobre la misma sección, se puede encontrar la forma de preparar un mate mediante un listado paso a paso.

“**Tipos de mates**” en esta sección se detallan algunos de los mates que existen actualmente, contando cada uno con una imagen ilustrativa.

“**Contacto**” ofrece la posibilidad de que el usuario pueda hacer una consulta, cargando sus datos y enviándolos.

“**Nosotros**” sección en la que se muestran los medios de contacto con MATERAZZI, su número, redes sociales y horarios de atención.

“**Mates**” como su nombre lo indica en esta parte de la página podemos encontrar los mates que se ofrecen, su precio y una imagen del tipo de mate.

Decidimos crear una página web ya que todos los integrantes del grupo poseemos el mismo conocimiento de las tecnologías web vistas en WEB I y WEB II. Además, el crear una página web de cero facilita la asignación de tareas entre los distintos integrantes del grupo.

Organización del grupo

Llevamos a cabo el trabajo en grupo, realizando las tareas asignadas en Trello, actualizando el repositorio de GitHub y comunicándonos en un grupo de Discord en el que íbamos subiendo screenshots de la consola Git a medida que se finalizaba una tarea.

En las siguientes páginas del documento se detalla cómo fue la utilización de GitHub y sus comandos para poder crear “MATERAZZI”.

El comienzo de "MATERAZZI"

Trello

Uno de los integrantes creo un tablero en Trello para comenzar a asignarse las tareas mutuamente y así comenzar con el proyecto. El link del tablero es el siguiente:

<https://trello.com/b/wORfPnd6/tpe-tio>.

Creación del repositorio.

Un integrante del grupo creo el repositorio en GitHub con un archivo README.md.

<https://github.com/ferminmedina1/TPE-TIO>

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

The screenshot shows the GitHub 'Create a new repository' form. At the top, there are two input fields: 'Owner' with a dropdown menu showing 'ferminmedina1' and 'Repository name' with a text input showing 'TPE-TIO' and a green checkmark. Below these is a note: 'Great repository names are short and memorable. Need inspiration? How about [scaling-carnival?](#)'. The 'Description (optional)' field is empty. Under the 'Visibility' section, the 'Public' radio button is selected, with the text 'Anyone on the internet can see this repository. You choose who can commit.' Below it, the 'Private' radio button is unselected, with the text 'You choose who can see and commit to this repository.' The 'Initialize this repository with:' section has three checkboxes: 'Add a README file' (checked), 'Add .gitignore' (unchecked), and 'Choose a license' (unchecked). Each checkbox has a brief description and a 'Learn more' link. At the bottom, there is a green 'Create repository' button.

Y cada uno se encargó de clonar el repositorio con el comando **git clone**.

```
54249@DESKTOP-OIVE900 MINGW64 ~/Desktop/TPE-TIO
$ git clone https://github.com/ferminmedina1/TPE-TIO.git

```

Primer archivo.

Se comenzó con un simple index.html sin diseño, el cual conformaba el home de la página. Fue pusheado a la rama main que previamente había sido creada desde GitHub.

Resultados de un trabajo en equipo

Para concluir, podemos asegurar que tenemos una muy buena base en la cual trabajar a futuro en este proyecto. Gracias a que cada integrante del equipo se adaptó de forma rápida y sencilla a esta nueva forma de trabajo.

Por el momento solo creamos lo que en el desarrollo web se lo denomina como front-end. Por lo tanto, solo cuenta con cinco secciones que tienen su propio diseño.

Cabe aclarar, que como nombramos anteriormente esto es una base sólida de un desarrollo en equipo. Por lo que esto recién empieza, MATERAZZI tiene mucho camino por delante, tanto de parte front-end como de back-end.

Imágenes de MATERAZZI
